Zika Virus Precautions

This Bulletin updates the maritime industry on risks associated with the Zika virus. Recently, the World Health Organization designated the Zika virus as a global public health emergency. This has prompted questions from the maritime industry regarding reporting requirements for any vessel crewmembers or passengers who may be exhibiting symptoms of the Zika virus. Vessel and facility representatives are reminded of the **following requirements to report hazardous conditions and illnesses**:

- Under 42 C.F.R. § 71.21, vessel representatives are reminded that they are required to report sick or deceased crew or passengers within the last 15 days to the Center for Disease Control (CDC).
- Also, under 33 C.F.R. § 160.215, the owner, agent, master, operator, or person in charge of a vessel is required to immediately notify the nearest Coast Guard Sector whenever there is a hazardous condition aboard the vessel. While the presence of a person with Zika like symptoms does not necessarily constitute a hazardous condition, vessel operators should report suspected cases or other unusual circumstances whenever they are in doubt. The Captain of the Port should ensure that any parties making a report of this nature are informed of their obligation to notify the CDC.

Some key points to remember concerning Zika:

- Zika is a virus that is spread by mosquitoes; the virus may be spread via blood transfusions, sexual contact, and from mother to child in the womb. Most people who get Zika will not have any symptoms.
- Those who do get symptoms will generally have a fever, rash, joint pain, conjunctivitis (red eyes), and, occasionally, muscle pain and/or a headache. It is uncommon for people infected with the Zika virus to require hospitalization, and deaths are rare.
- There is no specific treatment or vaccine for Zika. Recommended supportive care is rest, hydration, and pain/fever management with acetaminophen (i.e., Tylenol).
- The CDC is investigating a possible link between birth defects and Zika infection during pregnancy. While this link has not yet been definitively established, the CDC recommends the following:
 - o pregnant women consider postponing travel to any Zika-affected area;
 - o women who are trying to become pregnant and are planning travel to a Zika-affected area talk to their healthcare provider about the risk of Zika infection; and
 - o if a pregnant woman must travel to a Zika-affected area, she should strictly follow steps to prevent mosquito bites during her trip.
- Take preventive measures to avoid mosquito bites. The mosquitoes that transmit the Zika virus bite mostly during the daytime.
 Cover exposed skin and use insect repellent. (Do not use insect repellent on babies younger than 2 months of age). CDC information on insect repellent and recommendations for preventing mosquito bites can be found at http://wwwnc.cdc.gov/travel/page/avoid-bug-bites.
- Use authoritative information sources to obtain the latest news about the Zika virus such as those with .gov or .mil websites including http://www.cdc.gov/zika. Cyber criminals often use high interest events to target unsuspecting individuals. To avoid cyber phishing scams, do not respond to or click on links in unsolicited email regarding the Zika virus.

Questions regarding this MSIB should be forwarded to the Office of Port and Facility Compliance (CG-FAC) at (202) 372-1171/1107 or by email at CGFAC@uscg.mil.

Freezing Spray Observations - All Coastal and High Seas Waters

NOAA and Environment Canada are evaluating each country's freezing spray forecast models and tools in an effort to improve freezing spray forecasts. With ship observations of freezing spray, Environment Canada and NOAA scientists and forecasters will be able to better predict freezing spray conditions to protect life and property at sea. NOAA and Environment Canada are requesting mariners that encounter freezing spray to submit observations online at http://go.usa.gov/WYbm.

Freezing spray is an important safety issue in coastal Canadian and United States waters. In an effort to improve freezing spray forecasts, NOAA and Environment Canada are teaming up to evaluate each country's freezing spray forecast models and tools. Analysis of freezing spray cases, forecaster feedback, and ship observations will allow Environment Canada and NOAA scientists and forecasters to better predict dangerous freezing spray conditions to protect life and property at sea.

The success of this study depends on you: whenever possible, please report icing conditions to NOAA and Environment Canada

U.S. Coast Guard to Test Automatic Identification System (AIS) Aids to Navigation (ATON)

In the near future, the U.S. Coast Guard and other authorized agencies and organizations (i.e., U.S. Army Corps of Engineers, Marine Exchange of Alaska) will begin transmitting AIS ATON messages and marine safety information via AIS for testing and evaluation. The exact content, location, and times of these broadcasts will be announced in future Local Notices to Mariners.

AIS is an internationally adopted radio communication protocol that enables the autonomous and continuous exchange of navigation safety related messages amongst vessels, lifeboats, aircraft, shore stations, and aids to navigation (AIS ATON). AIS ATON stations broadcast their presence, identity (9-digit Marine Mobile Service Identity (MMSI) number), position, and status at least every three minutes or as needed. These broadcasts can originate from an AIS station located on an existing physical aid to navigation (Real AIS ATON) or from another location (i.e., AIS Base Station). An AIS Base Station signal broadcasted to coincide with an existing physical aid to navigation is known as a Synthetic AIS ATON. An electronically charted, but non-existent as a physical aid to navigation, is identified as a Virtual AIS ATON. The latter two can be used to depict an existing aid to navigation that is off station or not watching properly or to convey an aid to navigation that has yet to be charted. All three variants can be received by any existing AIS mobile device, but they would require an external system for their portrayal (i.e., AIS message 21 capable ECDIS, ECS, radar, PC). How they are portrayed currently varies by manufacturer, but the future intention is for the portrayal to be in accordance with forthcoming International Standards (i.e., IEC 62288 (Ed. 2), IHO S-4 (Ed. 4.4.0)).

Mariners capable of receiving and displaying these test AIS messages are encouraged to provide feedback and report any anomalies to the USCG NAVCEN Website: http://www.navcen.uscg.gov | Contact Us Tab | Subject: AIS | Category: AIS Testing.

Autonomous Underwater Vehicle and Juvenile Salmon Tracking Project Summary Reference Mooring Deployment

National Marine Fisheries Service, Auke Bay Laboratories

The National Marine Fisheries Service (NMFS), in partnership with the U.S. Geological Survey and Rutgers University, will be deploying temporary ocean moorings in Southern Chatham Strait near the Little Port Walter Research Station (LPW). The moorings are part of a research effort to assess the use of autonomous underwater vehicles (AUV) for conducting fisheries research and studying the outmigration of juvenile Chinook salmon.

Twenty-four reference moorings will be deployed; three will be placed approximately 3 kilometers north of LPW, three will be placed approximately 3 kilometers south of LPW, and eighteen will be near the mouth and within the Port Walter area. The moorings will have yellow or orange buoys and will be clearly labeled "NOAA RESEARCH". All moorings will be a minimum of 200 meters apart and at least 50 meters from the shore.

The moorings will be deployed between March 16 and March 26, 2016. All equipment associated with the study will be removed completely no later than December 15, 2016.

AMSEA Workshops of Interest to Mariners in District 17

The Alaska Marine Safety Education Association is offering a number of classes in U.S. Coast Guard District 17 that may be of interest to mariners. Many of these workshops are offered at no cost to commercial fishermen, thanks to support from the U.S. Coast Guard, the National Institute for Occupational Safety and Health, and the Alaska Department of Commerce, Community and Economic Development. For more information or to register for a workshop, call AMSEA at 907-747-3287 or visit our website at www.amsea.org.

Fishing Vessel Drill Conductor Workshops

These workshops give participants hands-on training with emergency equipment that should be onboard any commercial fishing vessel, such as PFDs, life rafts, immersion suits, EPIRBs, fire extinguishers. Participants practice emergency procedures like man overboard, abandon ship, firefighting and flooding control.

The workshops are US Coast Guard-accepted and meet the training requirements for drill conductors on documented commercial fishing vessels operating three or more miles offshore. The workshops are open to all mariners and are recommended for captains and crew serving on any commercial vessel.
